Geology, Mining Industry Products Catalogue

Bhadale IT Developers Pvt. Ltd | Bhadale Real Estate Developers Pvt. Ltd (registration due)

Plot No. 52, Hindwadi, Belgaum, KA, India | Mobile: +91- 9741040195 | Website: TBD

Bhadale Group of Companies

Bhadale Group of Companies consists of Bhadale IT Developers Pvt. Ltd and Bhadale Real Estate Developers Pvt Ltd.

1. **Bhadale IT Developers Pvt. Ltd** is an IT and Computer Engineering company

This company provides consultation in areas of cutting edge technologies, research outsourcing, and software consultation related to data center and related engineering practices

2. **Bhadale Real Estate Developers Pvt. Ltd** is a Real estate company

This company provides development of Infrastructure for IT Datacenter and allied sectors. It manages the engineering design, landscaping, civil architecture, presently serving internal projects.

Bhadale Group of Companies has aggressive programs in place to serve the niche market.

Bhadale Group Engineering Division, Geology, Mining Products department

Geology, Mining Products department hosts various products leveraging upon latest emerging technologies. Most of our products have got a matured approach that offer full benefits and ever growth potential to the consumers. We offer scientific ways of solving the pain points of Geology, Mining firms, research trials and allied industries that enable faster, easier and economical ways of managing the Geology, Mining industry across major downstream, mid stream and upstream business units. We offer value added products that enable various players like researcher, scientist, trainer, and seller to get the best value from this market segment and make better profits with help of AI, automation and engineering systems that enable the user to lift heavy tasks with ease.

Below are first listed products

Intelligent GIS and mining system: Based on CNN and adaptive progressive learning, we offer base structures for selective slicing of images, filtering, pixel level analysis, classification and analysis to derive high value analysis and predictions for miners to chose their next mine. Also we offer remote structural analysis by way of echoed sound signal analysis that enable us to draw various layers of rock types, soil, sand, water, gas and many more elements that help in drill points, mining activities and risk management. We offer remote help to miners by way of sending them crucial data to their mobiles using wireless networks or preloaded charts prior to entry into the caves

Details of the above are put in the table below

Product details

We have a large set of offers; few are mentioned below base images

Product No	Product Name	Key Product features
1	Intelligent GIS and mining system	This is a package with all data structures required for implementing a GIS project. One model we use is shown below. We have relevant GUI, hardware, software modules well integrated with the GIS and overlay networks that reach out to the connected workers, connected intelligent tracking and guided mining Intelligent Workplace Intelligent Equipment - Onboard Management System - Real-time data & telemetry - VOIP & PTT Connected Worker - Tablet Based Management System - VOIP Connectivity iSEC - Positioning Services - Asset tracking - Volumetric Processing - Video/Image Processing - Other sensors Control Center Plant Stakeholders: - Supervisor - Supply chain management - Rock Engineering - Geology - Mine planning - Health, Safety & Environment More details at Ref 1

The image is a general high level view to show what all constitutes of the AI solution. The use of convolutional neural networks (CNNs) has been extended to low resolution satellite imagery and it has been show to improve feature identification as low resolution data could be enhanced with basic input in different spectral bands

For Image details please refer Ref 3.
